### What's New In?

New configuration dialog, ability to automatically bind 'service and commchan', support for Cyrillic input, and improved handling of USB connection errors when searching for SMS via UsbSMSProvider. Pages Wednesday, March 21, 2017 Last Supper 2017 : Corned Beef and Cabbage with Cheddar My family never really got on the holiday food rut, with Christmas and New Years being the exceptions and then as soon as it ended it was back to turkey, cranberries, fruit cake and the dreaded birthday cake. So I tried to avoid the repetition and made a dish that was a bit of a novelty - Corned Beef with Cabbage and Cheddar. It's been a while since I had corned beef and it just didn't do it for me. So I went for the middle ground and created this recipe, where I borrowed a bit from rogan josh, The Curried Beef. I think the best part of this dish was the soaking of the corned beef overnight and doing it a day or two before I planned to make the cabbage. The result was good, but I will never have a similar taste to corned beef again. At least not this year. But when I do make it again, I will make it in a claypot and I will chop the cabbage a little smaller. Preheat oven to 250°F Cover the bottom of a baking dish with butter Slice the corned beef into thin slices Add salt and pepper and then drizzle with honey and red wine vinegar Cover with a lid and let sit in fridge for a day or two Slice the cabbage, into about half inch pieces Throw cabbage into the baking dish and add salt Cover with lid and bake for about 45 minutes While the corned beef is cooking, mix the cheddar, mustard, parmesan, crème fraîche and hot sauce together. Serve in a bowl over the cabbage. Sprinkle with the parsley and serve with some crusty bread You've made a good choice. I recently tried cheddar corned beef and was quite disappointed. But a friend was from Ireland and made this dish for me and it was delicious, so I am thinking about making it again soon. I would use chives instead of parsley if I made it again.
